## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 1/21/10 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

### ***Allowable Subject Matter***

2. Claims 40 and 59-74 are allowed.

3. The following is an examiner's statement of reasons for allowance: As laid out in the previous rejection, it was the examiner's position that the combination of Mikoshiba, Yamaoka and Fujii obviated the limitations of the invention claimed, however, the examiner is persuaded that although Mikoshiba discloses particles having a mean diameter which obviates the range of 0.5-5  $\mu\text{m}$  claimed, Mikoshiba does not reasonably disclose to one of ordinary skill in the art that addition of a second type of fine particles having a mean diameter of no greater than 100 nm as claimed in independent claims 40 and 59.

4. The particles disclosed by Mikoshiba are used to control coating conditions so that an average height of the bumps in the cross-linked polymer layer is in the range of 0.3 to 1  $\mu\text{m}$ . (Col. 9, lines 5-8) The particles are disclosed to have an average diameter between 2 to 4  $\mu\text{m}$ . (Col. 8, lines 65-66)

5. Applicant's specification discloses that the superfine (diameter of no greater than 100 nm) particles have the effect of leveling the cured resin layer to provide the function of preventing generation of Newton rings while also reducing sparkling on the liquid crystal display. The prior art cited does not teach this function for superfine particles, nor does the prior art provide an alternative motivation to one of ordinary skill in the art to include particles an order of magnitude smaller than the particles disclosed by Mikoshiba in a cross linked resin layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
